

I understand that the impact that regional and national carriers have on the public airwaves is being scrutinized. KLOVE is a station which first began encouraging me about four years ago in Chicago during my morning commute. I now live in Denver and it still encourages me during my day. KLOVE is a constant companion in my car (2-8 hrs. daily) and when weather is bad, idiots are on the road, or I have a bad day it always lifts my spirits.

I know that KLOVE has a positive impact on my family so our day starts off on the right foot. This broadcaster plays music that I CANNOT find anywhere else and have come to enjoy. During this election season, KLOVE is truly an Island in the Desert for me. I listen to all genere of music and KLOVE does something for me that no other broadcaster provides on the radio dial.

Were Klove taken off the air I know that it would not be a benefit to the public good. During the day I visit many businesses, KLOVE is frequently the station of choice. When I have commented on the music people have told me that they choose KLOVE because they never have to worry about language or content thus offending their customers or employees.

Thank you for you time to express my views on how KLOVE is a POSITIVE influence on my life.
